

Q21

```
include <stdio.h>
```

```
int main(){
    int l,n;
    scanf("%d",&l);
    scanf("%d", &n);

    while(n--)
    {
        int w,h;
        scanf("%d %d", &w,&h);

        if (w<l||h<l)
        {
            printf("UPLOAD ANOTHER\n");
        }
        else if (w==h)
        {
            printf("ACCEPTED\n");
        }
        else
        {
            printf("CROP IT\n");
        }
    }
    return 0;
}
```

```
1 #include <stdio.h>
2
3 int main(){
4     int L,N;
5     scanf("%d%d", &L,&N);
6     while(N--){
7         {
8             int W,H;
9             scanf("%d%d",&W,&H);
10            if(W<L||H<L){
11                printf("UPLOAD ANOTHER\n");
12            }
13            else if(W==H){
14                printf("ACCEPTED\n");
15            }
16            else{
17                printf("CROP IT\n");
18            }
19        }
20    }
21    return 0;
22 }
```
